DAO LE TRONG

FRONTEND SOFTWARE ENGINEER | FULL STACK SOFTWARE ENGINEER

letrongdaocontact8@gmail.com +84 582 124 303 Ho Chi Minh City, Vietnam LinkedIn Portfolio

PROFESSIONAL SUMMARY

Software engineer professionally experienced in building and maintaining business-critical web applications. Skilled at designing user-centered interfaces and robust backend APIs, with a track record of delivering maintainable, high-quality solutions across the full stack using TypeScript and JavaScript. Adaptable and detail-oriented, with a strong drive to learn new technologies and build software that creates real value for users and businesses.

TECHNICAL SKILLS & LANGUAGES

Languages	TypeScript, JavaScript, C#
Frontend	React, Next.js, Redux Toolkit, Zustand, React Query, Tailwind CSS, Framer Motion
Backend	Node.js, NestJS, Express.js, ASP.NET
Databases	MySQL, PostgreSQL, Microsoft SQL Server, Supabase
Cloud & DevOps	Vercel, Render, Cloudflare, GitHub Actions
Tools	Git, Postman, Figma, Claude Code

AI-First

Development

- **Daily AI pair-programming**: use Claude Code to plan features, write and refactor code, and generate tests.
- **Spec first, then prompt**: break work into clear tasks and context so AI output fits the codebase.
- **Human review**: read, test and fix every AI change before merge — AI speeds me up, I own the result.
- **Reusable setup**: keep project rules and context files so AI agents follow team conventions.

WORK EXPERIENCE

Software Engineer
May 2025 – July 2026

OCBS Securities Joint Stock Company

Internal MIS and Departmental Admin Systems

- Built the front end of a Management Information System (MIS) serving the internal departments including Project Management, Accounting, Risk Management and HR.
- Implemented ASP.NET / SQL Server APIs powering a Risk Management module that tracks customer risk levels and assigned programs.
- Acted as day-to-day maintainer of the system in production, resolving defects reported by business users and delivering change requests without interrupting daily operations.

Shareholder Meeting Portal

- Rebuilt the company's Shareholder Meeting Portal (check-in, eligibility control, ballot counting, live results).
- Ran smoothly on first live use, serving a meeting of 60+ shareholders.

eKYC - taikhoan.ocbs.com.vn

- Built the public-facing KYC landing page guiding customers through opening a securities account via the company mobile application.
- Contributed to the account-opening form, including input handling and validation of the identity information required to complete registration under the firm's onboarding requirements.

Technologies: React, TypeScript, Ant Design, ASP.NET, Microsoft SQL Server

Frontend Developer Intern

Sep - Dec, 2023 & Mar - Apr 2025

Ky Nguyen So Software Company & Sunshine Software Company

- Built reusable React components (forms, tables, modals) with TypeScript and Ant Design, reducing duplicated UI code across pages.
- Integrated front-end screens with REST APIs, handling loading, error and empty states for a smoother user experience.
- Fixed cross-browser and mobile layout bugs, making key pages fully responsive on small screens.
- Participated in code reviews and daily stand-ups, adopting team conventions for Git workflow and component structure.

Technologies: React, TypeScript, Redux, Ant Design

PROJECTS

HNB Hub

Github

Solo full-stack project • Oct 2025 – Jul 2026

- Solely designed, built and run a live community app for **10+ active members** — data model, frontend and backend.
- Event module with sign-up and fair cost splitting: only members who actually attend share the cost.
- Newsfeed, group chat, folder-based photo & video library, seasonal group minigames and daily check-in with streaks.
- Media stored on Backblaze / AWS S3; deployed on Vercel with Cloudflare.

Technologies: Next.js, Supabase, Backblaze, AWS S3, Zustand, Tailwind CSS, HeroUI, Framer Motion, Vercel, Cloudflare

Daoism (Portfolio)

Github

Solo full-stack project • Sep 2026

- Solely designed and built this portfolio as a scroll-driven 3D pop-up book: each section is a spread, with page turns and pop-ups on sticks done in pure CSS 3D.
- Built with Next.js, TypeScript, Tailwind CSS and Motion, with pointer parallax, reduced-motion support and a dedicated phone layout.

Technologies: Next.js, shad/cn. Framer Motion, GSAP, Vercel

EDUCATION

Master of Information Technology

University of Information Technology, VNU-HCM
In progress

Bachelor of Software Engineering

FPT Ho Chi Minh University
2022 - 2025 • GPA: 3.14 / 4.0

LANGUAGES & SOFT SKILLS

- **Vietnamese:** native
- **English:** professional working (IELTS 6.0, 2019)
- Problem solving, teamwork, fast learner
