SUMMARY

Full-stack engineer with 1.5+ years of experience building web apps for a securities company. I ship features end to end — UI, API and database — and keep production systems stable for daily business users. I use AI tools every day to plan, code, review and test faster, while owning the quality of every line that ships.

AI-FIRST DEVELOPMENT

- **Daily AI pair-programming:** use Claude Code to plan features, write and refactor code, and generate tests.
- **Spec first, then prompt:** break work into clear tasks and context so AI output fits the codebase.
- **Human review:** read, test and fix every AI change before merge — AI speeds me up, I own the result.
- **Faster onboarding & debugging:** use AI to explore unfamiliar code, trace bugs and explain legacy logic.
- **Reusable setup:** keep project rules and context files so AI agents follow team conventions.

TECHNICAL SKILLS

Languages	TypeScript, JavaScript, C#
Frontend	React, Next.js, Redux Toolkit, Zustand, React Query, Ant Design, Tailwind CSS, Framer Motion
Backend	Node.js, NestJS, Express.js, ASP.NET
Databases	PostgreSQL, MySQL, Microsoft SQL Server, Supabase, Redis
Cloud & DevOps	Docker, Vercel, Render, Cloudflare, GitHub Actions
AI Tools	Claude Code, prompt & context engineering, AI-assisted code review and testing
Other Tools	Git, Postman, Figma

WORK EXPERIENCE

Software Engineer May 2025 – Jul 2026
OCBS Securities Joint Stock Company

Internal MIS & Admin Systems

- Built the frontend of an internal MIS used by Project Management, Accounting, Risk Management and HR.
- Main day-to-day maintainer in production: fixed user-reported bugs and shipped change requests with no disruption to daily work.
- Built and updated backend APIs for the same system.

eKYC Account Opening — taikhoan.ocbs.com.vn

- Built the public landing page that guides customers to open a securities account through the mobile app.
- Built the account-opening form, with input handling and identity data validation to meet onboarding rules.

Shareholder Meeting Portal

- Rebuilt the portal from scratch to run annual general meetings: check-in, eligibility lists, ballot counting and live results.
- Ran smoothly on first live use, serving a meeting of **60+ shareholders**.

Tech: React, TypeScript, Ant Design, ASP.NET, Microsoft SQL Server

Frontend Developer Intern

2023 – 2025

Sunshine Software Company (Mar – Apr 2025) · Digital Era JSC (Sep – Dec 2023)

- Shipped product updates and fixed UI/UX issues with senior engineers, improving usability, responsiveness and visual consistency.

Tech: React, JavaScript, Redux, Ant Design, HTML, CSS

PERSONAL PROJECT

HNB Hub

github.com/letrongdao1/hnb-inc

Solo full-stack project · 2025 – Present

- Designed, built and run a live community app for **10+ active members** — data model, frontend and backend.
- Event module with sign-up and fair cost splitting: only members who actually attend share the cost.
- Newsfeed, group chat, folder-based photo & video library, seasonal group minigames and daily check-in with streaks.
- Media stored on Backblaze / AWS S3; deployed on Vercel with Cloudflare.

Tech: Next.js, Supabase, Zustand, Tailwind CSS, HeroUI, Framer Motion, Backblaze, AWS S3, Vercel, Cloudflare

EDUCATION

Master of Information Technology

University of Information Technology, VNU-HCM

In progress

Bachelor of Software Engineering

FPT University, Ho Chi Minh City

2021 – 2025 · GPA 3.14 / 4.0

LANGUAGES & SOFT SKILLS

- **Vietnamese:** native
- **English:** professional working (IELTS 6.0)
- Problem solving, teamwork, fast learner
